**From:** Felonius Gru

**To:** IT Staff

**Subject:** Plan for Network Defense

Teams,

I received a phone call from our network provider. They are seeing a large amount of traffic and suspect our network is being scanned and likely under attack by hostile external entities. I expect you have already discovered this and are working on a plan I can share with our VP in the Rim. Please find whatever security resources, recommended steps, best practices, strategies, etc for securing and optimizing a network environment. Citing your source(s), provide a report broken into three sections.

Section #1: What steps have you already taken?

Section #2 What immediate steps are you taking in the next 3 hours?

Section#3: Where are your priorities before close of business today? What you are looking for and any specific steps or plans you wish to execute?

If necessary, you should include needed performance optimizations or required configuration changes. Please have this done in 90 minutes and remember this is going to our executives. Remember this is going to be forwarded to a Vice President and will eventually make it the CEO's desk. It must be professional.

Thank you.
