

Team: Team 02 - ASU

Inject Number: 16

Inject Duration: 90 Minutes

Inject Start Date/Time: Sat, 28 Jan 2017 11:42:31 -0800

From: Felonius Gru

To: IT Staff

Subject: Security Policy

A proper and enforced security policy can prevent your team from becoming the next sad news story. We started your team off without any such policy, however, a quick check on the Internet and you will find plenty of resources, samples and templates. Please use these resources to create a policy.

The policy you create can be as organized and detailed as you like, so long as the it is clear enough for users to understand. At minimum it should address three areas:

- 1) User Password and System Usage Guidelines
- 2) Data Loss Prevention
- 3) Network Change and Configuration Management

Please create a draft policy that addresses each of these 3 points and provide best practices we should be following. As well as uploading your final document to the Team Portal, with a Post of the policy somewhere on a web server so employees can access it. Include the link for the online version when you submit.

I need this done in 90minutes. I do not expect you to reinvent the wheel. Try and rely on existing resources. Just make sure you cite any and all source material copied.

Thank you.
