Subject: Deploy Chat Software

Hello Team,

I just got done talking to the auditors. It seems we need to move faster on the XMPP POC then I would have hoped. Apparently there have already been some... Incidents regarding chat here in the past and we need to deploy ASAP. Time to go to go straight to production.

Please deploy Pidgin.im to clients install on all hosts with a desktop environment. If it has a Desktop where a user can log in then we don't want anyone using some other chat app.

The auditors are keen to get this work complete. You can probably send me a 2 page report listing what machines you installed the client on and include a few screenshots of users logged in.

Thank you.

John H.
