Subject: Is this configured correctly?

Hello Team,

It seems we have Identified several systems in our environment. I have noticed that the Wiki server seems to be misconfigured. Please start an audit of this system. We are looking for you to identify any security concerns and how we can remediate them.

Please provide a quick one to two page report on the concerns you have and how you will manage or mitigate the risks you identify.

Once you have submitted your report please start your mitigation.

Thank you.

Garey Grunnill
