Subject: Where can they get in?

Looking through the audit findings from the systems report, I'm seeing a lot of services running that were not approved by management. The approved services are as follows:

Machine,Protocol
Jackson,http
Professor,ftp
Professor,http
Professor,ssh2
Rooster,dns
Thegiver,ftp
Thegiver,http
Thegiver,ssh2

Please secure all non-essential services and provide a report detailing how you chose to secure the non-essential services.

Thank you.
