Is There PII?

We have investigated the IIS server running on our network. The level of information exposure on the IIS server is minimal. We have checked each page on the webserver along with the files hosted on the webserver and found no PII exposed on the web pages. The following are images showing the webpages content with the most exposure:
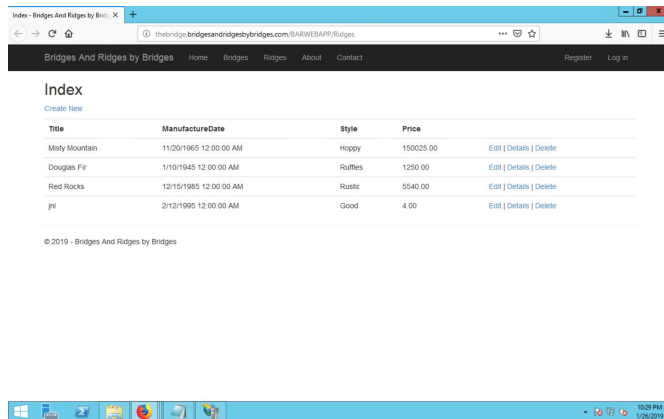

1.   Homepage

2.   /Bridges

3.   /Ridges

4.   /Contact
